

In the function “makerange” the argument “beg” is not used and the struct field “first” is not initialized which causes all usage of first to be undefined.

When we run fuzzing on the fixed problem we do not get any errors however five runs on the original file give the following outputs:

-e:

57 errors

Radamsa output: garbage1.base64

-r

27 errors

Radamsa output: garbage2.base64

-q:

57 errors

Radamsa output: garbage3.base64

-o:

57 errors

Radamsa output: garbage4.base64

No flag:

57 errors

Radamsa output: garbage5.base64
